

Mobile Sales Insights and Trends Analysis

Tool USED: Power BI

Project Overview :-

Objective:

To analyze mobile phone sales across brands, models, and cities using Power BI to generate actionable business insights.

Dataset Highlights:

Multiple years of sales data (2021–2024)

Metrics tracked: Sales, Quantity, Transactions, Price

Includes Monthly, Quarterly, Yearly trends, MTD/YTD

Business Goal:

Track performance, identify top brands/models, analyze trends, and improve decision-making.

Visuals Used :-

KPIs (Key Performance Indicators) :-

Displayed using **KPI Cards**:

- **Total Sales:** ₹769M
- **Total Quantity Sold:** 19K units
- **Transactions:** 4K
- **Average Price:** ₹40.11K

Filters & Slicers :-

Used to dynamically filter visuals across the report:

- **Brand** (Apple, OnePlus, Samsung, etc.)
- **Mobile Model** (iPhone SE, Galaxy Note 20, etc.)
- **Payment Method** (UPI, Debit Card, Credit Card, Cash)
- **City** (Delhi, Mumbai, Chennai, etc.)
- **Time** (Year, Quarter, Month, Day)

Visuals Used :-

Charts :-

Bar Charts – Sales by City, Brand, Mobile Model

Line Charts – Sales Trends (MTD, YTD, SPLY)

Map Visual – Sales Distribution by City

Pie Chart – Payment Method Usage

Column Chart – Quantity by Month, Sales by Weekday

Matrix Table – Brand-wise Sales, Quantity, Transactions

DAX Calculations :-

Used for creating dynamic measures and comparisons:

- `Total_Sales = SUM('Sales'[Amount])`
- `Total_Quantity = SUM('Sales'[Quantity])`
- `Average_Price = DIVIDE([Total_Sales], [Total_Quantity], 0)`
- `Transactions = DISTINCTCOUNT('Sales'[Invoice_ID])`

DAX Calculations :-

- `MTD_Sales = TOTALMTD([Total_Sales], 'Sales'[Date])`
- `YTD_Sales = TOTALYTD([Total_Sales], 'Sales'[Date])`
- `Sales_SPLY = CALCULATE([Total_Sales], SAMEPERIODLASTYEAR('Sales'[Date]))`
- `Sales_By_Brand = CALCULATE([Total_Sales], ALLEXCEPT('Sales', 'Sales'[Brand]))`
- `Good_Rating_Count = CALCULATE(COUNTROWS('Sales'), 'Sales'[Rating] = "Good")`

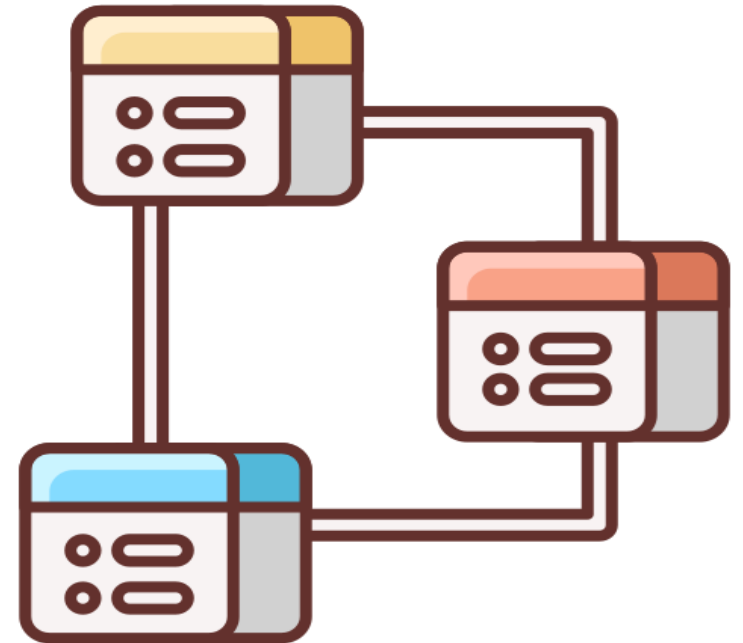

Data Modeling :-

Tables Used:

- Sales (Fact Table)
- Date (Time Dimension for MTD, YTD, SPLY)
- Product, Customer, City, Brand (Dimension Tables)

Relationships:

- Star Schema design with Sales Center
- One-to-Many relationships with dimension tables.
- Ensured optimized performance with proper filtering.

Key Insights :-

- ✓ Top Brands by Sales : Apple > Samsung > OnePlus
- ✓ High Performing Cities : Delhi, Mumbai, Chennai
- ✓ Consistent Sales Growth across Q2 and Q4
- ✓ Balanced Payment Preference across UPI, cards and cash
- ✓ Peak Sales Days : Mondays and Fridays
- ✓ Most customers rated their experience as 'Good'
